Introducing the Wechsler Intelligence Scale for Children®–Fifth Edition, the latest version of the most proven trusted cognitive ability measure ever. Find out more about Q-interactive go to helloq.com.au. The WMS-IV was developed to provide you with the most advanced measure of memory. With results you can trust, the WMS-IV can help: The Wechsler Adult Intelligence Scale | Fourth Edition (WAIS-IV) is the most advanced adult measure of cognitive ability, based on recent research in the area of cognitive neuroscience and the theories and work of David Wechsler PhD. Of the 33 children assessed, 16 were girls and 17 were boys. Table 1 gives the characteristics of the sample including birthweight, gestational age (GA), apgar at 5 min, SES, and the age of school testing. These children were considered low risk, although one was small for gestational age.
